

# Quiz 04

Five short answers | 20 points | 4 points each

Write 1-3 sentences per answer. Questions 1-4 concern the lecture; question 5 concerns one core reading. Suggested time: 15-20 minutes. Use your own words. No deadline or submission policy is set in this prepared copy.

Name: \_\_\_\_\_ Student ID: \_\_\_\_\_

1. Why can a video made from individually attractive frames still fail? Name one property that must remain coherent across time and give an example.

---

---

---

2. Choose one input condition, such as a reference image, depth sequence or motion reference. What property does it help control, and what does it leave unspecified?

---

---

---

3. State one artistic intention for a short art video and one concrete visual or timing choice that could support it. Explain the connection.

---

---

---

4. Why might a generated shot still need editing or other production work before it fits a film? Give one specific example.

---

---

---

5. Choose one of the three core readings. Name the paper and a specific section, figure or case. Explain one decision it would change in your own art-video workflow and one limitation or check you would keep in mind.
