AMCC 5160 · Quiz 11 (Review)

Two technique questions, two art questions, and one reflection. Each asks you to connect ideas from different lectures. 4 points each; 20 points total. Answer in your own words (1–3 sentences). Submit online at https://hyang.org/amcc5160/quiz-11/ before the end of the semester.

1. Technique: Drift in long video (Lecture 07), a world model that forgets the red door (Lecture 09), and a robot whose small errors compound (Lecture 09) share one cause. Name it, and describe one technique from the course that reduces it. (4 points)

2. Technique: Your main character's face changes from shot to shot in your A2 or A3. Choose two methods from Lectures 02, 05 or 08 (for example a reference image or IP-Adapter, LoRA, DreamBooth, or a motion latent like VASA-1). Say what each one supplies or trains, and give one trade-off between them. (4 points)

3. Art: Choose one of the four debates (Lecture 07, 08, 09 or 10). Give your vote that night, your vote now, and one piece of evidence from a different lecture that moved or confirmed it. (4 points)

4. Art: Write the credit block for the project you will present on November 17 or 24: models and versions, your human work counted, references, consent, and one plain sentence of disclosure. (4 points)

5. Reflection: Which single idea from this semester most changed how you make or look at work? Name the lecture, and give one concrete example from your own project. (4 points)

Where to look: the Lecture 11 slides and study guide link to every earlier slide you need: https://hyang.org/amcc5160/lecture-11/
